
COLLOQUIUM

THE INSTITUTE FOR QUANTUM INFORMATION SCIENCE

3:00 pm, Wednesday, 6 July 2005, in SB 146

Dr. Alexei Trifonov

Chief Scientist and Vice-President Research and
Development

MagiQ Technologies Inc., Boston, USA

Title: Practical Quantum Cryptography

Abstract: Quantum cryptography is coming out of the research labs and is entering the world of commercial applications. Several companies already announced commercially oriented product or working prototypes. In my talk I will overview the recent progress in QKD apparatus development and highlight the technological aspects that affect the performance of commercially oriented QKD systems.
